Applicant's Information Disclosure Statements, filed on August 21, 2008 have been considered. Please refer to Applicant's copies of the 1449 submitted herewith.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a), which forms the basis for all obviousness rejections, set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 1626

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 and 2 are rejected under 35 U.S.C. 103 (a) as being obvious by EP 0274 401.

Applicant's instant invention is directed to a process for continuously hydrocyanating 1,3-butadiene in the presence of an Ni(0)-containing catalyst.

Determination of the scope and content of the prior art (MPEP §2141.01)

EP 0274 401 teach a continuous process of hydrocyanation of butadiene using a catalyst comprising at least one phosphonite ligand based Ni(0) complex. (see EP 0274 401, page 2, lines 23-44.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The difference between the prior art process and the process claimed in this Application is that the instant process states that the molar ratio of 1,3 butadiene to the hydrogen cyanide is 1.6: 1 to 1.1:1 as opposed to 0.5:1 to 1:1 of the prior art.

Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)

In the absence of any unexpected result one skilled in the art would have found the claimed process prima facie obvious because it is well established to those skilled in chemical art, similar processes that involve similar starting materials, catalysts and

reagents are expected to give similar products. Changing the molar ratio of the reactants is desirable in industry where the concentration of reactants is a major key parameter in the chemical process. However, the Courts have decided per *In re Boesch*, 205 USPQ 215 (1980), that the optimization of variables, such as pH and molar ratios, in a known process is *prima facie* obvious. Therefore, the claimed process would have been suggested to one skilled in the art. Therefore, the instant claimed process would have been suggested to one skilled in the art.

Objections

Claims 3-16 are objected to for depending on a rejected base claim.
